

For your neat Computer/Telephone network cable installation and maintenance it is now even simpler to test with "LAN LINE TESTER" cable tester.

Just slide both ends of your RJ-45 or RJ-11 plug into tester itself or one end into tester and another into detector and it guarantees the right connections and cabling for your computer /telephone network up to 2000m with 8 effective LEDs (on the master unit or detector), displaying wiring information which enables you to check any open, short or cross over between end to end connections.

Features portable handheld size with belt hanger bag convenient for job sites.

Certified by IRAN Electricity and Computer Research Center

Key Specification: 2xRJ-45 on master unit, 1 on detector, 2xRJ-11 on master unit, 1 on detector

Dimensions: Master unit: mm (H) x mm (W) x mm (D), Detector: mm (H) x mm (W) x mm (D), Temperature: 30 to 130 degree F Humidity: 10 to 90%, Cable length: 2000m, 1x9V Batteries
